Description:

The LIFT cabins are a unique architectural solution for sanitary spaces where design plays a crucial role. LIFT is a line of cabins characterized by a recessed leg and an invisible reinforcing profile. From the front, this creates the impression that the cabins are suspended in the air, inspiring the name of this unique system.

LIFT cabins offer not only aesthetics but also solidity and durability, guaranteeing long-term use and maintaining an elegant appearance for many years.

The visual consistency of the project concept and the emphasis on cleanliness and hygiene are key elements that translate into positive user experiences.

The effect of floating cabins perfectly complements the prestige and elegance of facilities such as office buildings, hotels, or shopping centers. It is an excellent solution wherever interiors require exceptional style and a unique character.

only Torx screws are used

doors opening outward or inward

hinges with gravity self-closing

very high durability

tailor made to individual dimensions

Impressive impression of lightness

CE certificate valid throughout the European Union

Fittings with a brushed steel finish

Fittings developed by ALSANIT are manufactured in Poland at the company headquarters

Production on CNC machines ensures precision and short lead times

Standard dimensions

Standard equipment

LIFT construction details

Construction details:

Hinges

- tested durability: 200,000 open/close cycles
- typically for ALSANIT, mounted to narrow edges of panels
- made of brushed steel with a polyamide insert
- gravity self-closing
- minimalist appearance
- optionally - hinges for internal doors not visible from the outside

Knob-locks

- elegant, ergonomic and highly durable
- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click“ every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs

- "hanging" cubicle effect
- made of brushed steel
- ensure easy leveling of partitions
- for 10-18 mm boards mounted to the side of the board, for 28 mm and thicker boards screwed into the core
- adjustment range +/- 20 mm
- rosette mounted on two dowels, covered with a plate

Types of panels available for the system:

MFC

Laminated chipboard

18 mm

28 mm

MFC is compressed under high temperature and pressure using binding agents with wood chips. The top layer is a decorative melamine coating.

- edges are finished with durable edging using HOT-AIR technology (glueless)
- suitable for rooms with normal humidity

Fire classification: Ds1d0

A solution for door frame for MFC boards

Support leg mounted on a partition wall

Rear-mounted beam

Wall and partition mounting

HPL

High pressure laminate

10 mm

12 mm

HPL (High Pressure Laminate) - cellulose fibers saturated with resin and compressed under high pressure. The material is 100% waterproof and its properties are consistent throughout the entire board cross-section.

- milled edges-black core of the board is visible
- for rooms with high humidity

Fire classification: Cs2d0 - 10 mm, Bs1d0 - 12 mm (option)

A solution for door frame for HPL boards

Support leg mounted on a partition wall

Rear-mounted beam

Wall and partition mounting

SP

Sandwich panels

36 mm

Panels with a total thickness of 36 mm - feature an aluminum frame filled with foamed polystyrene, 28 mm thick, with outer layers consisting of 4 mm HPL.

- excellent rigidity and aesthetics
- ideal for full-height installations
- provide the best soundproofing

Fire classification: Es1d0

A solution for door frame for SP boards

Support leg screwed into the core

Rear-mounted beam

Possibility of using a handle

Concealed mounting for walls and partitions

URINAL PARTITIONS

By using an aluminum rosette, we achieved an effect of exceptional lightness.

ALSANIT urinal partitions are installed using rosettes, eliminating the need for support legs.

available
colors

page 14

Urinal partitions

- Powder-coated rosette in a color close to RAL 7035
- Easy installation
- Minimalist appearance

MFC

18 mm

HPL

10 mm
12 mm

Sink countertops are an important element of restroom furnishings.

Due to the direct exposure to water, they need to be made of durable materials and properly installed.

available
colors

page 14 →

Vanity tops

- preparation for sink installation
- all visible edges routed
- need for panel joining for countertops longer than 2600 mm
- optionally additional mirror frames matching countertops

HPL

10 mm

12 mm

SHOWERS

Shower cubicles produced by ALSANIT are aesthetic, practical, and durable.

Thanks to the use of durable, and fully waterproof materials, ALSANIT shower cubicles are an investment for many years. Showers are typically made basing on the SOLARI system fittings.

page 14 →

HPL

10 mm

12 mm

Installation:

1. Level and mount the bottom profile to the floor.

2. Place the steel frames for cladding on the profile, align, and attach them to the masonry wall.

3. Connect the frames with „shadow” panels. Mount masking panels at the bottom and top.

4. Fit the cladding panels up to the height of the utilities and fixtures. For the cladding where fixtures will be installed, cut openings for the connections/fixtures.

5. Secure and connect the fixtures to the cladding.

6. Install the remaining cladding.
